## Definitions

**Notional Trading Volume:** *We define Notional Trading Volume for any specified asset class as the aggregate dollar value (purchase price or sale price as applicable) of trades executed in that asset class on our platforms over a specified period of time. Robinhood App Crypto Notional Trading Volume represents the dollar value of executed trades on the Robinhood platform over a specified period of time. Starting in June 2025, Bitstamp Exchange Crypto Notional Trading Volume represents the dollar value of executed trades on the Bitstamp platform over a specified period of time. For example, each \$1 of transaction value executed between a buyer and seller is counted as \$1 of transaction value in the relevant period, rather than \$2 if counted for each of the buyer and seller.*

**Options Contracts Traded:** *We define Options Contracts Traded as the total number of options contracts bought or sold over a specified period of time. Each contract generally entitles the holder to trade 100 shares of the underlying stock.*
